Deloitte.

Phishing as a service

Your security is as good as your weakest link – your employees

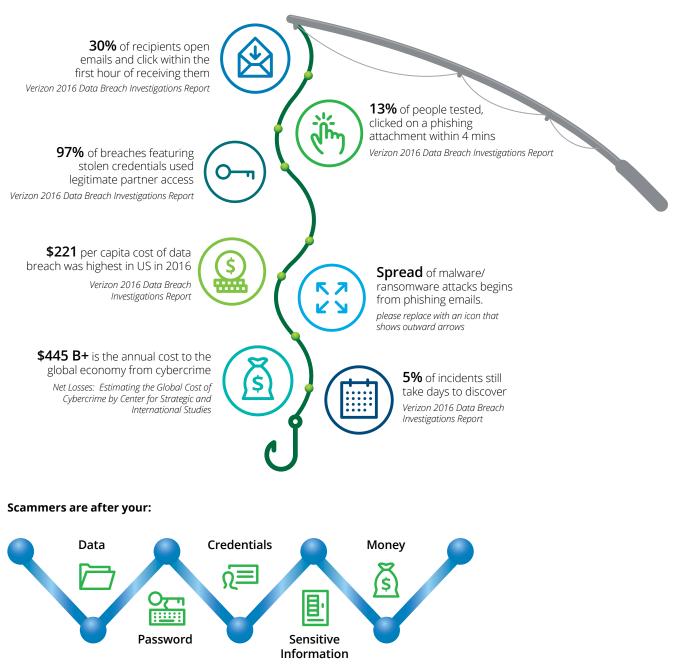

Phishing as a service

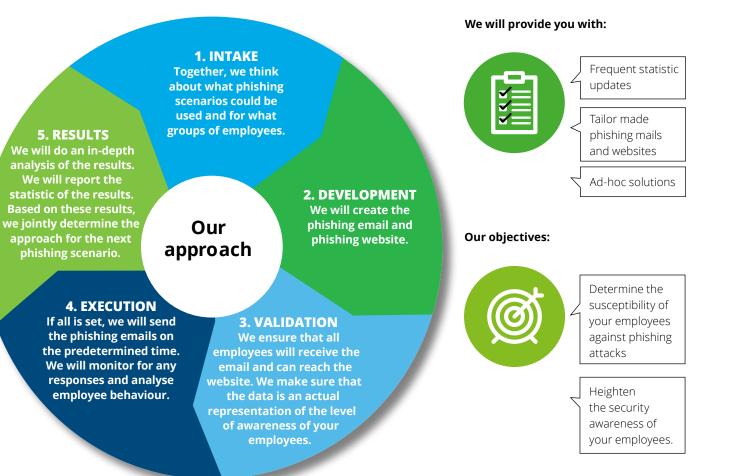

What is Phishing and Phishing Exercise?

Phishing is an attempt to lure individuals into providing sensitive information over the internet in which targets are contacted by email by someone posing as a legitimate institution.

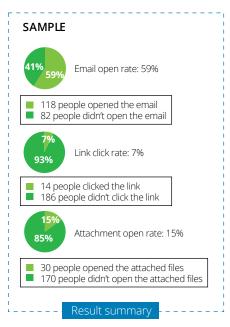

In Phishing Exercise, we assess cyber readiness and awareness of your organization through Phishing scenario.

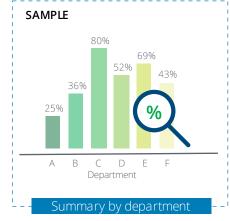

Why do we need Phishing Exercise?

For the statistic report, we present:

04

Email phishing workflow

Scenario identification	Intelligence gathering	Operation execution	Result presentation
Initial reconnaissance	Cyber reconnaissance	Mass phishing	Result discussion
Perform initial reconnaissance to identify test scenario key factors, plan changes in the environment facilities and potential employee target groups.	Use online sources such as company websites, social media presence, third party websites, to gather client- related information.	Obtain confidential or gain unauthorized access by sending mass-phishing emails to employees.	Conference or face-to- face meeting with senior stakeholders to discuss critical findings, overall outcome and facilitate a Q&A session.
Mass phishing vs. Spear	Employee social media	Spear phishing	Report
phishing Discuss and agree with the client on the type of e-mail phishing to be performed: mass phishing vs. spear phishing.	presence Gather employee information by browsing through employee social media profiles. When necessary, connect to employees via social media channels to obtain needed information.	Obtain information or gain unauthorized access by sending personalized spear-phishing emails to a specific group of employees. Additionally, the spear phishing scenario may include installing custom malware on the laptop/ desktop.	A report delivered in a mutually agreed format and template, that includes a management summary, issues, recommendations and further steps.
Scenario(s)	Mass phishing target(s)	Further exploitation	Awareness
Combine information gathered to build up a set of scenarios. Discuss and agree with the client on the scenarios to be executed.	confirmation Identify and agree with the client on target employees.	Use phishing email and malware as a starting point to analyze the internal network as a stepping stone to the tactical network exploitation.	Increase the security awareness of employees through security lectures, workshops and demos.
Spear phishing target list		Metrics	
Obtain from the client a list with employee email addresses to be targeted during the spear phishing attack.		Measure how many employees responded to the emails and test several aspects of user awareness such as willingness to give away passwords or personal information.	

Email phishing workflow

Pre-engagement

- Confirmation of objective (flags)
- Confirmation of "target"
 distribution list

Engagement

- Simulate a 'phishing' attack against the agreed address list
- Demonstrate the relative success of the attack by collecting non-personally identifiable information for statistical purposes

Post-engagement

Client Briefing/Presentation

Phishing awareness
 workshop and e-learning
